

Find Billiard Rooms Across the USA:

If necessary, you should print this document and read it while you are on your computer.
Click here to print this document.

To locate a billiard room that has a carom billiard tables, look at the left-hand menu of options on the USBA website (www.USBA.net).

The 7th option from the top says, “**Billiard Rooms Nationwide**”. Click that option.

The first box is where you would enter the name of the billiard room you are searching for (if you know the name). For best results, just enter one main word. For instance, if you are looking for “Carom Café”, then simply enter the word “Carom”. Then click “**Search Rooms**” at the bottom. The results will then be displayed. Every room with the word “Carom” in its name will be displayed.

If the room has a website, then you can click on the room’s website link to go their website. A new window will open up. If we have any photos of the room, then click “**View Photos**” to see them. Then click the back button on your browser. You can also click “**Return to Billiard Rooms Home**” on the upper right side of the page to go back to the billiard search page or just click “**Billiard Rooms Nationwide**” again on the left-hand menu.

The 2nd box on the billiard room search page is for the name of the proprietor or contact. Perhaps you know the room owner or contact’s name but forgot the name of the room. You can enter the name of the owner or contact to find the room. For example, if you entered “Kang” (“Michael Kang”), then Carom Café’s information would be displayed. You could also just enter “Michael” and you would see all the rooms that have an owner or contact named “Michael”, but I wouldn’t count on finding what you are looking for. The last name is best.

The 3rd box is the name of one of the 50 U.S. States and also the District of Columbia (Washington, DC). If you select one of the states, then EVERY room within that state will be displayed when you click “**Search Rooms**”. If you leave it blank, then EVERY room in the whole country will be displayed.
